

## Reusable, Rigid Wall and Collapsible, Semi-Bulk Nut Containers

### AGRICULTURAL APPLICATIONS

Pecan Container Topfill

COMPACT - 15 Empty Units  
on One Pallet

Pecan Container Filled

### WAREHOUSING / STORAGE APPLICATIONS

#### FOUR HIGH STACK ...

Shown at the right in rain storm with the bottom unit being discharged. Note how the stack has remained sturdy ... units are strong enough to support the stacked load even if the units are wet due to condensation, a spill, or sprinkler system going off in the warehouse. Our IBC is so strong it can handle the static load when one or more of the units are empty.

Rotational Dumping

Top Lift Loops and Bottom Discharge

- 1) Reduces number of trucks delivering empty packages at your facility
- 2) Reduces labor required for unloading trucks and retrieving packaging from warehouse
- 3) If IBC is re-used, dramatically reduces per trip cost

### One Truck Load of Empty CEC Reusable IBCs Equals:

| Product             | # of Truckloads |
|---------------------|-----------------|
| Spacekraft*         | 2.1 truckloads  |
| IP** Corrugated IBC | 9.2 truckloads  |
| 55 Gallon Drums     | 8.0 truckloads  |
| Bottle and Cage     | 9.2 truckloads  |
